

## Rejuvenated Titans Open Season With Adrian College Friday

### THE CO-ORD TO BE PUBLISHED BY ENGINEERS

First Issue of Technical Magazine To Appear on October 15th

#### JOE FISHER HEADS STAFF

An important addition has been made to the growing list of campus publications with the opening of the new semester in the university. The Co-Ord, a technical magazine published by the College of Engineering will make its initial appearance on October 15. The contents of the magazine will be of vital interest to the tech student and to the industries of the city that employ them.

The principal objective of the publication will be a closer tie between the theory of the classroom and the practice of the shop. It will afford an excellent channel of publicity for the university and its activities in the engineering profession of the city. Co-operating with every department of publicity on the campus a marked increase in public relations with the university is an assured outcome of its inauguration.

Engineering students will form the entire staff of the magazine and their writings will be supplemented by articles from various men prominent in public and industrial life. Faculty contributions will appear from time to time on the research work conducted in the laboratory.

#### CIRCULATION IS LARGE

The circulation of the magazine will be large. Every industry in and near the city that employs or are prospective employers of the engineering students will be placed on the mailing list. Technical societies, schools and libraries throughout the country will also receive copies. It is planned to forward each alumnus a copy of the first issue, and afterward subscriptions will be taken. This circulation presents an excellent medium for industrial advertising.

### U. D. FEATURES HUGE RALLIES

Freshmen to Build Bonfires, Speakers to Address Titan Boosters

Pep rallies, decidedly necessary factors in the staging of football games, will be inaugurated with the University of West Virginia (night) football game. The second and tentatively the final pep rally will be held on the evening preceding the University of Iowa (day) game.

Last year the departments built and burnt their own individual bonfires. The engineers (the Freshmen) came through in excellent fashion and it was due to their efforts that the pep rally preceding the Tulsa game was a success. Due to inclement weather and a slight lack of interest on the part of the A. and S. C. and F. Freshmen, and perhaps also on the part of the coaching staffs, later pep rallies were fizzes.

This year in keeping with the aims of the university officials to unify the various departments, all the Freshmen from all the departments will work together in building and putting across these rallies. The Freshmen of this year have expressed themselves as being eager to inaugurate the fire features and already some have voluntarily begun a pile of fuel for the first sky-lighter.

All the bonfires will be held at the south end of the football practice field facing Florence avenue, and they will be gigantic in proportions if present plans materialize.

Last year when a host of players, students and alumni invaded Morgantown, that stronghold of Southern hospitality situated on the banks of the picturesque Monongahela, their welcome was of such a nature that to this day it is a current topic of discussion. Because of this fact the first rally will be one of unbounded interest among both U. of D. advocates and those loyal sons of the South who will come up for the West Virginia tussle. If it is possible the committee in charge of the staging of the rally will have members of the West Virginia squad and W. Va. student leaders address the ralliers.

### MANY CHANGES APPEAR IN FACULTY

Many Leave For Further Study; Law School List Remains Unchanged

During the past few days, upper classmen may have noticed the changes and additions to the personnel of the faculty. These changes are the result of increased student registration and are due also to the departure of professors from the various colleges of the university, who intend taking further study or have accepted new positions at other universities.

The College of Arts and Sciences has lost the following: Fr. Robert E. Manning, Latin and Greek; Leon Basler, French, who has taken up a course in Foreign Service at Georgetown University; and Alphonse J. El, German, who has returned to Europe for further study. The list of those added to the college are: Fr. Hugh O'Neill, Latin, who is taking Fr. Manning's place; Dr. Richard P. Koepke, who replaces L. Basler; Dr. Arthur R. W. Dejonge, German, who replaces A. J. El.

Dr. Muttkowski reports the following additions to the Department of Biology: C. Courson Zelliff. (Continued on Page 4)

### U-D INSTITUTES NEW LAW COURSE

Lawyers to Study National Laws on Radio and Aviation

The Law Department of the University of Detroit has instituted a course in air law, which includes aviation and radio. Professor Kurt W. Kremlick will conduct on Monday evenings from 5:15 to 7:15. The term commences October 1.

Single courses may be taken and no legal experience is necessary for enrollment; although it is expected that many practicing attorneys will avail themselves of an opportunity which only three other colleges in the United States are now offering.

Among the aviation subjects to be treated are air space rights—both horizontal and vertical, airports and airways, protection of rights of private owner against invasion by airports, liability of pilot on aerial trips, law of carriers for airplanes, bonds for developments and negligence of airport owners. Ludicrous as it may seem, crimes in the air are possible, and this phase will receive considerable attention.

#### COMMISSION DEFIED

Radio will also be taught in this course. The State of Michigan recently defied the Federal Radio Commission. Since both state and city police are using the radio on a large scale as a weapon against crime, the question now is whether radio is a public utility or not.

The installation of new broadcasting stations and the revoking of Henry Ford's right to broadcast, has added to a perplexing problem. The radio law of 1927 will be gone over minutely, and such phases as taxation, control of broadcasting copyright, and unjust practices, will receive attention.

### COMMERCE SODALISTS MEET AT NOON TODAY

The first regular meeting of the C. & F. Sodality will be held in the chapel in the basement of the Chemistry Building this noon from 11:55 to 12:15. James Haggerty, Senior C. & F., will tell about the sodality convention held in Chicago last June. A representative crowd of Varsity squad men, Varsity News staff, and all others prominent in campus activities is expected. Freshmen are also urged to attend since there will be no C. & F. Frosh hazing Wednesday noons.

### Listen In

On Station WJBK for University of Detroit news. This station will broadcast all the home football games. At various times, in between their broadcasting periods, pertinent announcements concerning U. of D. affairs will be heard. This is an inauguration that will be developed within the next few weeks. WJBK broadcasts over a frequency of 1370 kilocycles, 218.8 meters.

### Heads Co-Ord

JOSEPH A. FISHER

### ALUMNI MAGAZINE TO APPEAR IN OCTOBER

William J. Maledon Will Head Reorganized Staff; Other New Changes

#### NEW PUBLICITY DIRECTOR

The staff of the Alumnus, organ of the Alumni Association, has been re-organized with William J. Maledon succeeding John M. Carlyle as editor. Assisting Mr. Maledon are Miss Constance Maier as business manager with Joseph A. Luyckx as advertising manager and Edmund T. Barbour as circulation manager. Mr. Maledon is well known in university circles owing to his many activities during his college career. He was editor and managing editor of the Varsity News, editor of the Tower, president of Alpha Sigma Tau, and president of the Classical Club. Mr. Maledon is now a member of the faculty as an instructor in mathematics.

The Alumnus, heretofore, has appeared spasmodically, with no definite date of publication, but the paper will now be issued once a month.

It is the intention of the staff to publish a magazine which will compare favorably with the alumnus publications of the larger universities. The first number under the regime will appear on October 1.

Cyril A. Lingeman succeeds William B. Harrington as publicity director of the university. Mr. Lingeman entered the U. of D. High in 1910 graduating from the University in 1918 with an A.B. degree. After two years with the Cass Technical High School department of attendance, Mr. Lingeman associated himself with his brother Casper J. as advertising director in 1923. During this time he published a group of parish weekly newspapers.

### U. STUDENTS HONOR MEMBERS OF FACULTY

Arts and Science Department Donates New Car to Dean Horst

#### FR. HEITHAUS HONORED

During the past year the students of this school took it upon themselves to honor two of their staunchest friends and benefactors. Shortly before school was adjourned for the Summer vacation they presented a Model "A" Ford Coupe to Rev. Jos. Horst, S.J., dean of their department. This gift was made possible by the earnest cooperation of all the A. & S. students. Each student voluntarily contributed a stipulated sum and soon the necessary amount was collected.

Fr. Horst was much pleased with the presentation and thanked the assembled students for their remembrance of his efforts.

#### MASS AT ST. CATHERINE'S

Later in the summer, July 6, the students again honored one of their friends when a reception was held for Rev. Claude H. Heithaus, S.J. Preceding the reception Fr. Heithaus had celebrated a mass in St. Catherine's Chapel, at which were present many of his most intimate friends.

During his term as a scholastic, Fr. Heithaus spent several years at the University of Detroit. He took an active interest in student activities. (Continued on Page 4)

### NEW POLICY MADE KNOWN BY V. N. STAFF

Important Changes to Insure General Improvement of Weekly Publication

#### EMPHASIZE FAIR DEALING

With the advent of a new scholastic year the editors of the Varsity News wish to announce that this, the official student publication, will be strictly a university paper containing news from every department. As in the past, partisanship in any political affair will be guarded against and the same impartial attitude which has characterized the Varsity News will be emphasized and continued.

Many important changes which will insure the general improvement of the publication have been made. A careful selection of new heads and type faces will enhance the attractiveness of make-up. Much new equipment in the way of typewriters and desks has been added to the office.

#### NEW CUT MORGUE

Prominent among the improvements is the new filing system installed for the large supply of cuts pertaining to every phase of university life. Included in the files are individual cuts of students, alumni, and faculty; group pictures of the various fraternities; views of all athletic contests and innumerable campus and building scenes. This improvement will greatly augment publicity work and be a valuable addition for all organizations. With the copious turnout of new material for the staff, together with the many improvements, the editors look forward to a year which will be unprecedented in university journalistic history.

### FREE COURSE FOR SHOP MEN

Announcement has been made by Dean Lawrence that the College of Engineering will initiate a special evening course for shop foremen in the various industries of the city. There will be two three-hour periods each week, extending over three eight-month years. The course will embrace studies in mathematics, drawings, free-hand sketching, English, electricity, elements of mechanism and industrial engineering. At the completion of the course certificates will be awarded.

The Engineering school has been a sponsor of the co-operative plan for students for the past five years. This policy has been an invaluable aid to the students for it has permitted them to pursue their studies while earning a salary and obtaining practical experience at the same time. To the industries of the city, however, should go a vote of thanks for it is this body that made it possible for the university to sponsor such a policy. It is because of this feeling that the university is introducing a curriculum for the shopmen of student grade. Simultaneously with its purpose of strengthening the co-operation between the industries and the school, it will afford a theoretical training for the foreman in his particular industry.

The course, which will be free, will open October 6. Application blanks have been sent out to all factories that have aided the university in its co-operative plan and these applications will be distributed by executives of the firms.

### CARR, GLIDER ACE, CONVALESCING

Kenneth Carr, U. of D. glider ace, who was seriously injured in the National Air Races in Chicago last August, is now convalescing at his home in Pontiac. Many students will remember the newspaper stories of the disaster that befell the engineering student while attempting to gain more laurels for his school and himself in the air. The accident occurred when the tow-rope connecting the auto and the glider it was towing failed to loosen. The glider and Kenneth Carr were dragged to the ground, resulting in a fractured pelvis, a slight fracture of the skull, and cuts about the face to the student flier. The accident has not dimmed the enthusiasm of Kenneth Carr, however, and as soon as recovery is complete he will again be seen taking to the air. (Continued on Page 4)

### V. N. Editor

PHIL STACKPOOLE

### MASS OFFICIALLY OPENS SCHOOL YEAR

General Assembly in Parish Hall Follows "Mass of the Holy Ghost"

#### STOREN, METRAS SERVE

The Mass of the Holy Ghost, celebrated in Gesu Church on Wednesday, Sept. 17, marked the official opening of the new school year. Rev. George L. Reno, S.J., celebrated the Mass and was served by Bill Storen, captain of the Titan eleven, and his teammate, John Metras. Rev. Hugh O'Neill, S.J., delivered the sermon, choosing as his subject "The Value of Knowledge and Wisdom." Fr. O'Neill stressed the fact that wisdom and knowledge are invaluable both spiritually and materially if they are applied to our actions and works in the correct manner. Our education gained in a Catholic institution is a mighty weapon which we can use in the struggles of our later life.

#### MASS OF THE HOLY GHOST

Following the Mass a general assembly was held in the parish hall. The meeting was opened with the singing of the school songs and familiarizing the students with the new March of the Titans. Under the leadership of Eddie McGrath, popular alumnus, the students put a zest and spirit into their task which has seldom been equalled and which speaks well for the spirit to be displayed at the coming football games.

Rev. J. P. McNichols, S.J., president of the university, next addressed the students, welcoming the student body and extending a hearty greeting to the freshmen in particular. Fr. McNichols based his talk on the rules and regulations to be followed out by the students at all times during the school year. Leniency will not be shown to an individual who has broken any rule simply because he is an outstanding scholar or because he holds a prominent position in campus activities. When a student has disregarded the rules and has been punished accordingly he need not resort to any ulterior influence in the hope of being pardoned. "The red book issued to all students is the standard of conduct to be maintained at all times," said Fr. McNichols in conclusion.

### FRANK J. POTTS TAKES NEW POST

To Facilitate Task of Securing Work For Unemployed College Students

#### FILE NEW APPLICATIONS

With the beginning of classes in the C. & F. and A. & S. the Student Placement Bureau is busy filing applications for part-time employment. Upper classmen are advised to report in regard to any change of address or phone number or to added experience during the summer months. Freshmen in need of employment are also invited to file their applications with the bureau.

The general depression of business at present has made it difficult for immediate placement. Realizing this, difficulty but desirous of helping students in need of employment for the continuation of their education the bureau has (Continued on Page 4)

### SINGERS PLAN REGULAR AIR PROGRAM

Organization Again Directed By Harry Seitz; Meeting Held Tuesday Evening

With all departments in full swing, except Section "B" Engineers, the Glee Club will commence its regular rehearsals Tuesday evening, September 23. Harry Seitz, after a busy summer course for advanced teachers at Ohio State, will again be in charge, thus assuring our Glee Club of the very best direction possible.

The group that remained faithfully to the end of last year, passing through the heavy fire of broken practices, opera chorus drill work, and the final radio program over WMBG will be in good shape to begin on a much more extensive program of activities this year. Rumors—hard to run down but nevertheless persistent—hint at possibilities of regular U. of D. programs "over the air," and if these materialize, there will be almost endless opportunities for solo work, vocal and instrumental, quartets and ensembles.

This means hard, faithful unremitting work on the part of the members and only regularity of attendance and sincere effort to improve will assure anyone of membership. All old members and such new talent as may care to apply will be welcomed in Room 106, C. & F. Building, at eight p. m. Tuesday, September 23. Practice will be held on Tuesdays and Thursdays this year to avoid collision with the Dramatic Club's Wednesday meetings.

### FORD ENGINEER LAUDS WIND TUNNEL

New Equipment Considered Asset to Aeronautical School and Industries

#### ASK STUDENT INSPECTION

William B. Mayo, the chief engineer of the Ford Motor Company, discussed the future possibilities of the new wind tunnel, and of its value to the aeronautical industries of Detroit, at the official opening on September 10.

The equipment of the new building is complete in every detail. In addition to the tunnel itself it contains a computing room, an engineers office, and a display lobby, in which model planes will be exhibited.

Students are invited to inspect the tunnel. A visit to the new building will afford an excellent opportunity to study the latest methods of aerodynamical research. As early as 1921, the University of Detroit was pioneering in the field of aeronautical engineering, and even at that early date the authorities realized the necessity of providing ample laboratory facilities, so that a properly blended course of theory and practice might be offered.

Accordingly the year 1923 marked the inception of the first wind tunnel, located in the basement of the old Engineering Building on Jefferson avenue. In 1927, however, with the College of Engineering firmly established on the new campus, and rapidly forging its way to recognition as the foremost aeronautical school in the country it became apparent that the existing tunnel was woefully inadequate for the needs of the students.

In 1927, plans were laid to raise funds for an aerodynamical laboratory that not only would meet the demands of the students, but would give the University of Detroit research facilities worthy of its high rank as an engineering institution. Construction work was started in 1929.

### Fellrath, '29, Meets Death in Accident

Richard T. Fellrath, Commerce and Finance graduate, class of '29, was drowned while aquaplaning at Portage Lake on Sunday, August 17. He was the son of Mrs. Clara J. Fellrath of Inkster, Mich. His cousin, Charles J. Fellrath, a student prominent on the campus the last four years, is also a graduate of the university. Members of Alpha Chi officiated as pallbearers and the fraternity attended the funeral services and interment.

### TWELVE LETTERMEN ARE NUCLEUS OF NEW SQUAD

Adrian Will Send Inexperienced Team For Opener Here; Tentative Lineups For Both Teams Are Announced

By TOM BURKE, Sports Editor

Adrian College with a team strength comparatively unknown to local fans meets the University of Detroit eleven on Dinan Field, Friday evening, Sept. 26, with a fond purpose in mind—to beat Detroit and give themselves a good start in winning the M. I. A. A. football championship. The fray will inaugurate the initial games for both teams and will introduce the new lighting system on the local campus. The game will resume relations between the two institutions which were broken off only three years ago.

Against the heavier Detroit aggregation Adrian will pit a squad of seven lettermen and a large group of inexperienced sophomores. Nothing much is known about their backfield and the strength of their line. Detroit will be weak in the backfield due to the loss of Lloyd Brazil, former captain and All-American half-back; Les Vachon, Mullins and Zettel. Another deficit that will be hard to overcome is the loss of almost a complete line from end to end. The names and ability of Young, Buckman, Anderson, Lardner, O'Halloran, Hart, and Navin will be sorely missed when the Titans face the team from Adrian. But encouragement will still kindle when one sees the abundant line material gathered from last year's freshman football squad. Line Coaches Boeringer and Brown will see to it that the U. of D. can boast of a forward wall as strong as previous years.

Nothing much is granted about the 1930 Titan football eleven for Coach Dorais is still experimenting in order to find the eleven best men. It cannot be expected that Detroit will be as powerful as the teams of '27, '28 and '29, for no football aggregation that loses 13 lettermen through graduation can repeat the same brand of ball the following season. Especially is this true when they are tackling the hardest schedule in the university's history. But the score of Friday's game already surmised in Detroit's favor should prove just how strong the 1930 Titans are and if they possess the fight that has carried other Titan teams to victory.

Detroit has one thing in its favor that the 1929 eleven had to overcome. This year's team has no winning streak to boast of, thus no worry about halting the string of successive victories. Our streak is broken, no team will be out to cut that consecutive success as they have been for the past three years.

Confronting this strong schedule, Coach Dorais will send onto the gridiron a team that contains no stars. Four fast backs working in unison will carry the brunt of the offense behind seven heavy linemen also working as a unit. Every man already named in the tentative (Continued on Page 4)

### ACTIVITIES HONOR SOCIETY TO MEET

Entrance Requirements May Be Raised at Year's First Meeting

The increased number of extracurricular activities on the campus has led to a decision by the Activities Honor Society to revise its list of points offered for this phase of university life. Many new channels have been opened which students may use. It is also expected the group will ultimately raise the number of points required for admission, and the revised list will appear in the Varsity News in the near future.

To the Freshmen and Sophomores who are not familiar with the Activities Honor Society, it should be explained that the eligibility of students is estimated on a point basis. The various campus activities are rated as having a certain point value, and when a student amasses a certain number of points, his name is presented to the society for consideration.

A meeting is planned for an early date to revise the list and for the election of officers for the coming year.

### ALPHA SIGMA TAU HOLDS ANNUAL ELECTION

Joseph Fisher Heads Honor Society; Plans For Year Discussed

At an Alpha Sigma Tau meeting held the latter part of May, Joseph Fisher, editor of the Co-Ord, the new engineering magazine, was elected president of the honor society for this year. The eleven students elected to membership last spring were the only members eligible to vote. Paul Lilly, of the Commerce and Finance college, was chosen vice-president.

Ralph Boone, managing editor of the Co-Ord, is secretary of the society. Phil Stackpoole, editor of the Varsity News, is treasurer. The members of Alpha Sigma Tau are expected to act in an advisory capacity in student activities about the campus. According to President Fisher, this policy will be extended during the coming year. The eleven Juniors to receive the coveted appointments "last spring and who will compose the active chapter this year are, William Clousey, Thomas McIntosh, Mark Devlin, John Dyer, David Leahy, David McHardy, Jack Quillinan and the officers already named.

### IMPORTANT

Students and organizations which still owe money on last year's class dances and opera must meet these obligations before they can take part in any further activities on the campus. Returns must be made within the next two weeks to the Dean of Men, Room 109 in the Chemistry Building.

### SODALISTS HOLD FIRST MEETING

Fr. Scott Asks For Members Capable of Leading Men in Catholic Activities

At the initial meeting of the Arts and Science Sodality of the new year, the Rev. Joseph L. Scott, S. J., director of the University Sodality, devoted the entire period to telling the members the type of young man that was wanted in the sodality of this institution. A man who feels that he can lead his associates in the Catholic world of today and who does not remain in the background when his religion is attacked is the type desired.

Father Scott told how inspiring a sight it was to see the two thousand delegates who attended the sodality convention in Chicago last June massed together to promote Catholic devotion. These young men and women displayed leadership and initiative when they gave their personal views on topics of interest to every real sodalist. They were not the type who would retire into the background during an attack on their faith.

Father Scott expressed the desire that during the coming year the sodality would assume a position proportionate to the size of this institution. During the past year the support was not all that it should have been.

A prospect that will be considered by the sodality during the coming year is that of a city-wide Sodality unit. This plan is functioning in the larger cities of the East and West, and consists in the high school sodalities uniting as a single unit under the leadership of the university or college of the city. If this policy is inaugurated in Detroit the University of Detroit and Marygrove College will become the nuclei about which the smaller units will centralize.

During the sodality period on Tuesdays from 11:55 to 12:15 Father Scott wishes to notify the Sophomore class that there will be no hazing, pep rallies, or any other form of interference. The purpose of this is to permit the Freshmen to attend sodality as this organization is especially open to them. During the week Mass will be said at 7:00 and 8:00 a. m., in the chapel in the basement of the Chemistry Building.

CONSTANCE T. MAIER Business Manager

"To an impartial recording of all campus news."
"To Catholic journalism."
"To inaugurate and uphold Titan tradition."
"To an understanding and unification between departments."

The U. of D. Weekly

The Varsity News is now able to concentrate all its energies and space on the undergraduate. With the advent of the new alumnus magazine and the engineering review, the Co-Ord, the Varsity News will handle only the news of the campus as was originally intended.

The staff is one of the largest that has ever been connected with any publication on this campus. It is hoped that they will meet the obligations they have willingly undertaken. If at any time they may be of service, call the office.

The paper itself has gained experience and we humbly hope, prestige. This year we will endeavor to cover every event of interest to a U. of D. student. We will do our best to place in the students' hands a paper that will keep them acquainted with the trend of activities.

A little co-operation and consideration on the part of those who are asked to supply material to the staff will be appreciated. A hint as to a pending news story will be regarded as a trust. If a fraternity or organization has an event on the fire, kindly let us in on it and perhaps we will be able to help.

A better Varsity News is a sign of a greater university. We pledge ourselves to service and loyalty, to promote Titan tradition, to build up the friendship and accord that prevails between the various departments of the University of Detroit.

King Football

Friday night under the brilliant lights of Dinan Field, the game with Adrian will usher in a new football season. To a greater extent than ever Coach Dorais is confronted with problems and responsibilities. From material, for the most part untried, he must replace some of the greatest warriors in Titan history. He must build a team which can successfully withstand the severest opposition in years, and he must, above all, maintain and further the national prestige which formidable Titans of the past have attained.

Surely the task is not an easy one, but the wisdom of Coach Dorais and the fighting spirit of his men have overcome seemingly insurmountable obstacles before, and we are not unduly optimistic when we predict that this year they will do the same. To do this, however, they must have the unstinted support of the student body.

Last year, after the Oregon defeat, there were a few fair-weather rooters who showed their true colors, but the university as a whole renewed and strengthened its support and, as a result, shared in the glorious Georgetown triumph.

It is a well-known fact that all the world loves a winner and it is anything but difficult to stick with a victorious team, and to point proudly to them as the representatives of one's school. The true test of loyalty and spirit comes only with defeat. Certainly we are not expecting defeat, but should it come, we should not relinquish our support, but should stick and spur our team on to newer and greater victories.

Welcome Frosh

To this year's Freshman class we extend a hearty welcome. They have come from far and wide to attend the University of Detroit. They have chosen wisely. Here they are offered advantages of every kind, the value of which is difficult to estimate. An elastic curriculum presents a complete and versatile array of subjects. The faculty is composed of men who, besides being leaders in their respective fields, have a personal interest in each pupil.

The library, already copiously supplied, has been added to and is being conducted in a way which insures the maximum usefulness for the student body. The football and other teams hardly need an introduction. Their achievements have made them nationally famous. In extra-curricular activities such things as the Varsity News, Tower, opera, etc., hold out unlimited possibilities. They have, in short, entered a truly great university and should be wide-awake and utilize its manifold opportunities, and in so doing, become representative sons of Alma Mater.

Foreign Missions

At the beginning of each year, Rev. Joseph Scott, S. J., dean of men, makes a plea for the foreign missions. In the past students have given liberally and, although the financial conditions are not so good as last year, the dean is again hoping that students will again lend this worthy cause their unstinted support.

Perhaps the students are unable to give as freely as last year, but it should be remembered that it is not the amount but the sacrifice which it entails that counts. It is the sincere hope of Father Scott that the contributions this year will equal or even exceed those of last year.

In the religion classes each week the contributions will be accepted by the instructors and each one should be ready to do his share.

The Varsity News Staff has grave fears of their being forced to go on a diet, since the editorial office has been cut in half.

CATHOLIC STUDENTS

All Catholic students who are interested in the organization of an acolytes society, are requested to be present at an organization meeting Friday evening, September 26, 1930, at seven o'clock in Fr. Scott's office in the Chemistry Building. The meeting will be called promptly at seven o'clock so that those attending can get away in plenty of time for the football game. All who registered last Sunday can show their interest toward the organization of this society by being present at this meeting.

BOOK NOOK

Commencing this week the university library, located on the third floor of the Engineering Building, will remain open every evening until 10 o'clock Saturday and Sunday. The number of volumes in the library has been greatly increased for the coming year and more are being added from time to time. Reference work for every school and department has been included in this increase.

The Editor of this column wishes to state that all the books reviewed and submitted here are chosen directly from the University of Detroit library and are available to all the university students.

The Bad Child's Book of Beasts

By Hilaire Belloc. A very humorous book full of more beasts and worse children. If the bad children are to have such entrancing reading provided for them, and the good children get to hear about it, tell me how the model infants are to be chained to goodness.

This is not a story but a book of verse or a treatise upon every species of animal and beast several of which we can term as of unknown species. Mr. Belloc has very humorously developed the highly imaginative type of animal.

The title is outstanding and really should be changed, for we cannot afford to lose such enrichment of a field of knowledge.

The Edwardians

By V. Sackwell West. This book has been chosen as the Literary Guild selection for the month of September. It is the biography of a family shown forth in its vital unity of mental and spiritual characteristics.

It is a rather stimulating contribution to a study of London and its people with the characters presented not wholly fictitious. It is a rather notable achievement in a novel of this calibre.

Other books of interest:

The Infidel Emperor—By Wiegler.

Pascal—By Chevallier.

Physco Analysis—By Ernest Jones.

Freighters of Fortune—By Beasley.

Unknown Essex—By Maxwell.

Valuable reference books: Tiffany Real Property. Volumes 1, 2, 3.

Principles of Inland Transportation. By Daggett.

Engineering books: Design and Construction of Dams—By Edward Wegman, C.E.M.Am., Soc. C. E. Published by John H. Wiley and Sons, Inc.

This new volume contains a complete treatise of the subject, including details of many of the largest dams in the world. It should be interesting to upper classmen, especially civils, who lean toward hydraulic engineering or who are particularly interested in the analysis of stresses in retaining walls.

A mathematical discussion of the subject is given by Fred A. Noetzel, D.Sc., M.Am., Soc.C.E. This discussion includes both theoretical and practical methods of computation.

Free, Captive Balloons—By Ralph H. Upson and Charles de Forest Chandler. Published by The Ronald Press Co.

The book is divided into three parts. Part one consists of a description of various types of free balloons, and of some details of navigation. The necessity of training in free balloons for men who are to be used as observers in captive balloons is stressed. Part one was written by Mr. Upson.

Part two, a description of captive balloons, and part three, a discussion of the various fabrics used for gas envelopes, are by Mr. Chandler. The third part especially might be of interest to aeronautical students who are interested in the design and construction of dirigibles, since much of the data given would be almost directly applicable to rigid or semi-rigid aircraft.

FATHER FITZGERALD VISITS UNIVERSITY

Rev. William Fitzgerald, S. J., former principal of University of Detroit High School, and at present president of St. John's, of Toledo, visited the university over the past week-end. In the company of Rev. John P. McNichols, president of the University of Detroit, he witnessed the night football practice held Friday and expressed his enthusiasm and well-wishes for the Titans.

The human jaw is said to be growing smaller. That's funny in view of the way that it is constantly exercised.—Dayton Journal.

FRATERNITY NEWS

Fraternity men note well the policy of the new editor relative to news of your frat to be published in this column. No news will be solicited; all stories must be either typewritten or legibly written; personal news will not be accepted; deadline for FRATERNITY NEWS will be Monday at noon. No news received after that time will be accepted for publication. All fraternities not in good standing with both the University of Detroit and the Inter-Fraternity Council will receive no news space in this column until the situation is rectified.

In order to procure the most valuable space in the column it is suggested that your fraternity correspondent submit copy as early as Thursday or Friday. All dance stories MUST be submitted not later than Friday.—The Editor.

Delta Pi Kappa, journalistic fraternity, is starting on another year of journalistic enterprise. A complete calendar of events has been mapped out by the Executive Council, composed of the officers of the fraternity, and two alumni members. Late in June the first Executive Council meeting was held at which time the more serious matters of business and journalistic importance were discussed. As many matters as could be passed upon were disposed and the rest slated for further action. At the next meeting held early in September, the Council took up all matters left and consummated its pre-season business. The first regular meeting was held last Thursday at the Seward Hotel and there were only two active members who absented themselves. The next meeting of the fraternity will be Oct. 2, at the Seward Hotel, at 8:00 p. m.

The officers for the coming year are: Joseph Starrs, president; Phil Stackpoole, vice-president; Henry S. Wich, Recording Secretary; John C. Cahalan, Treasurer; Jack Walsh, Corresponding Secretary; and John S. Malley, Historian.

Theta chapter of Delta Sigma Pi started the 1930-31 season of its activities with a bang when the Tenth Grand Chapter Congress was held in Detroit, September 10-14. Each of the 53 chapters was represented by at least one delegate and many chapters sent five or six, while some of those closer to

Alpha Chi, Social, will hold its first regular meeting Monday, Sept. 22, at Hotel Webster Hall, at 8:00 p. m. Plans for the current year were discussed and the old officers acquainted the new with their duties. The officers for this year are Wm. Enright, president; Wm. Guina, vice-president; Robert Redmond, secretary, and Edward M. Andries, treasurer.

Epsilon Tau has been having meetings throughout the Summer. The election of officers for this year was held Sept. 12, at the Seward Hotel. Leonard Milling of the Law School is the new president; Max Radom, vice-president; Simon Diamond, secretary, and Herbert Harris, treasurer, complete the roll of officers. Epsilon Tau will shortly be initiated into Phi Alpha, national Jewish fraternity. The fraternity plans many interesting af-

CAMPUS CHATTER

Greetings everybody! Give a look at this quotation from Francis Bacon's essay on "Friendship": "You may take flower of sulphur for the lungs, castoreum for the brain—but no receipt openeth the heart but a true friend; to whom you may impart griefs, joys, fears, hopes, suspicions, counsels, and whatever lieth upon the heart."

Well, this fellow Bacon was smart, and he must have had us in mind when he wrote this essay. We're friends, not only to the frivolous Freshmen, but right through to the sensible Seniors. So if you have anything on your chest, let us hear about it, and we'll do our best to give you the advice that only a columnist can.

But before we go any farther, we wish to bring to your attention the fact that any errors in this column, typographical or otherwise, are not intentional. We are human, you know, so with this fact firmly established in the minds of our readers, we will continue gaily on our way, laughing and being laughed at, with charity toward all (heh! heh!), and malice toward none (heh! heh! heh!).

Here goes! Trouble, nothing but trouble! Gill's dog, the bones of which he had industriously cleaned and polished for exhibition purposes in the biology lab, has been smashed. In consequence, Gill's out gunning for a specimen, and with such a personage on a rampage, we wish to warn our newly arrived Freshmen to keep out of his way.

The astronomical observatory is not as yet, but in some small measure the students have been compensated by the newly erected buildings on the campus, including a brand new shower-room, garage, and a welcome addition to the engineering building—to say nothing of the new lights in the stadium.

The busiest corner of the world, Broadway and 42nd Street, New York, was given a glimpse of the captain of America's up-and-coming football team recently when the New York Times displayed in its window a picture of Bill Storen

with this caption, "U. of D. Grid-ers Start Practice Season; Capt. Bill Storen Indulging in a High Kick". We might as well give the ceds a line or two. We've been doing a little "cherchez les femmes" (French profs note) and find that they are...

Recent Rumors: Jim (Vell! Vell!) Ryan is being schooled this fall at City College, but still lives in the northwestern section of the city for some reason or other. . . . To say nothing of the campus romance of last year which is still in full swing. . . . Wherein did Dave Leahy get that beret and trick Chrysler? Johnny Galbo has left for Marquette U. where he will take up medicine. . . . Marguerite Gahagan is still looking for a job. . . . Of all people! Walt Kelly, (Marygrove) and Bob Stefanowski (ex-football star) have removed their unwieldy presence from the Arts to the Law School. . . . All Steiner, of chess fame, might at least have left a board behind him. . . . Have you seen Jim Britt's imported wrist band, to say nothing of the Buick roadster which carried Marceline Day (or was it Baby Peggy) around Hollywood?

Detroit sent ten or more representatives. Kappa chapter of Georgia Tech with six men present carried off the Attendance Cup, given to that chapter travelling the largest total mileage. The Golf Cup went to Beta chapter of Northwestern, while Theta walked off with honors in baseball.

Five business sessions were held at which many problems and ideas were discussed. Each delegate returned home feeling that he had something of value to report to his chapter as a result of his presence at the convention.

In the line of social activities there was nothing left undone. Stag parties, dances, and dinner dances were provided. Every visitor left Detroit, acclaiming the ability of the men of Theta chapter to entertain. According to the consensus of opinion it was the most successful convention ever held in the history of Delta Sig.

Now the boys are ready to settle down to the carrying on of their own affairs for the coming year. There will be a meeting tonight in the smoking room of the C. and F. Building, at which ever member is urged to be present. There is much to be done relative to the fraternity's plans and business.

The officers of Delta Sig for the coming year are: Paul A. Lilly, Headmaster; George Sierra, Senior Warden; Howard Flannigan, Junior Warden; Thomas F. Benson, Scribe, and Earl A. Murphy, Treasurer.

Alpha Chi, Social, will hold its first regular meeting Monday, Sept. 22, at Hotel Webster Hall, at 8:00 p. m. Plans for the current year were discussed and the old officers acquainted the new with their duties. The officers for this year are Wm. Enright, president; Wm. Guina, vice-president; Robert Redmond, secretary, and Edward M. Andries, treasurer.

Epsilon Tau has been having meetings throughout the Summer. The election of officers for this year was held Sept. 12, at the Seward Hotel. Leonard Milling of the Law School is the new president; Max Radom, vice-president; Simon Diamond, secretary, and Herbert Harris, treasurer, complete the roll of officers. Epsilon Tau will shortly be initiated into Phi Alpha, national Jewish fraternity. The fraternity plans many interesting af-

fairs for the coming year, the first of which takes place the evening of September 26th. The fraternity will witness the opening game with Adrian and then adjourn to the Embassy Club for an informal affair. A smoker will be held Sunday, Sept. 28, at the Tuller Hotel, for prospective pledges.

The Argon fraternity will hold its first regular meeting of the new school year tonight at the club rooms on Woodward Avenue. Election of officers will take place and a calendar of fraternity events will be drafted for the current semester. It is important that every member be present.

Alpha Epsilon Pi installed its officers for the year at the first regular meeting of the year, which was held last Sunday afternoon at Webster Hall. Men who were placed in office included Allan Greenberg, master; Louis A. Malis, lieutenant-master; Sol Dunner, scribe; Morton Bebeck, exchequer; Albert J. Nagler, historian, and Cy Aaron, sentinel.

With the hope of establishing a house before the first semester has passed, the fraternity innovated a building fund to which all members, active and alumni, will contribute. A smoker in honor of prospective members will be held in the near future.

On Friday and Saturday, September 12th and 13th, the sixth biennial convention of Omega Beta Pi, National pre-medical fraternity, was held at Theta Chapter of the organization. Theta is located at the University of Ohio in Athens. Two official delegates from each chapter, and numerous other brothers and guests attended. Fourteen members of Iota Chapter, the local group operating on the University of Detroit Campus, were present.

Omega Beta Pi has resolved to foster a policy of expansion by establishing new chapters, both active and alumni, in the course of the next few years.

Beta Theta chapter of Alpha Kappa Psi will start the new College year with the annual installation of officers early next week. Notices will be sent announcing the date. During the past summer A. K. Psi held many social events which were well attended.

The Eta Zeta Sigma Sorority held its first meeting of the year on Wednesday, September 17, at the Sorority House. Miss Rosella Feltier, the new president, surprised the members by announcing that the Sorority has had several offers for affiliation with Commerce and Finance Sororities of high standing, throughout the country. The Sorority did not decide anything along this line, but will in the near future.

The Sorority meetings will be held on the first and third Wednesday of every month this year. Plans for the Sorority's annual Bridge-Tea were discussed, but not definitely decided.

Sophs Demand Respect From Frosh

After one week of indifferent hazing, chippy remarks by some Frosh of uncertain calibre and poor organization on the part of the Sophs, the hazing outlook has assumed a sterner aspect. The Freshmen have seemingly forgotten the purposes and seriousness of their initiation. The Vigilance Committee henceforward will seek to impress upon the minds of the yearlings the necessity of their hazing as well as its intentions of enforcing the regulations.

The situation as it exists at present, arouses much comment by upper classmen, outsiders and faculty alike. There is no one in the university who does not wish for a humming and universal school spirit. It is the fond hope of the president and all the university officials to have this university united as such. Engineers, financiers, lawyers, doctors, etc., are all wanted in a truly live and metropolitan atmosphere and they admit that Frosh hazing is THE ONE BIG FACTOR in bringing this about.

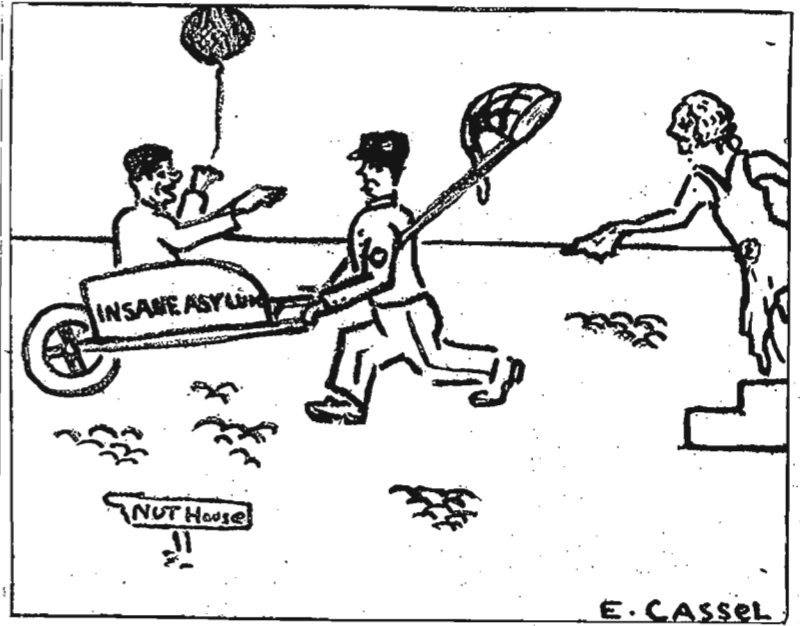

CONCENTRATED DRIVE

As a consequence, there will be a drive and a concentrated one, in which all Frosh will be included, football players, bespectacled fledglings, good scouts and real freshmen (prospective men) not excepted. First on the bill will be a general gathering of ALL Frosh on the campus, at which time they will be given specific orders relative to their future conduct at the university. Bonfires must be built, lawns must be cleaned of paper and other debris, pots must be worn and used as designated by the Soph Vigilance Committee. Co-eds must be respected by proper salutation—that is by potting—and the faculty in like manner. From time to time, the age-old excuse—I gotta work—has been hurled at the upper classmen. Beginning today, each student—that is each freshman—who wants to be exempt from the hazing campaign, will have to show a duly signed pass to that effect.

The freshmen at the U. of D. should be proud of their status and should endeavor to co-operate in the things expected of them as such. Orders from Sophs have been answered in the past week by nose-twiddling, try-and-make-me bits, etc.—thanks to a few

LARCENY MUSE

KINDLY REPORT ANY INCIVILITIES TO THE MANAGER

He's Leaving Me Without Reason, Chortled the Cutie as They Trundled Her Help-mate to the Looney Bin.

And at the last meeting of the Circle Street Sewing Club, the budget for the distribution of wild oats was approved. Hey! Mister, is this the Eata Bitta Pie meeting? Naw, you got the wrong crap game, Mister, this is Chippa Bitta Rock. Try out that first one again, Eddie, it looked weak.

BLOTZ PLANS TO BEAT THE BAND

French Horn, Ind. . . . Commodore Joseph Blotz, assistant to Otto Zilch on the ill-feted and much feted Polar Expedition, announced today that an intensive boycott of the stadium would go into effect unless musicians were put into the band. The boycott, according to Blotz, is sponsored by the local Boy Scout troop, thus explaining the connection, which is dubious, at best. "Although the stadium is not very old in years, what years there are will be listening intently to the band, consequently the need of musicians."

LARCENY MUSE GETS NEW EDITORIAL STAFF

Otto Zilch, publisher of the Larceny Muse, today announced the appointment of an entire new air-cooled editorial staff. Contrary to reports, this staff is not the staff of life, as that magazine and judge are still doing business at the old news stands. The only appointment made public was that of Fillup (Smokestack) Pool, a veteran at the newspaper and other games not listed in Spalding's. Mr. Pool, although quite beside

himself, fell in immediately with the plans, but was in no danger of getting wet.

Atwater Doakes, prominent man about town, has announced the policy of the Larceny Muse for the coming year. The little trickster claims there will be at least five pranks in the platform, as well as the fostering of another of those expeditions for which the Larceny Muse has become justly famous.

This year's expedition, which will last as long as possible, will be to the South Sea Islands. Mr. Doakes was only too pleased with the prospect of a winter in the tropics when the plan was broached to him. "My mother always wore a broach when she went to church, which was generally on Sundays, and as a result, broaches are always sacred to her memory," quoted the enterprising cigarette-sniper.

The purpose of the expedition was not known at the time, Doakes said if any were seen, they would catch them, as well as the turtles, and any other deep-sea mammals. "Turtle soup has no rival except purpose soup," said Doakes, "and nothing would be better than sitting down to a dinner of purposes and crabmeat." More news of this thrilling plunge into the tropics will be forthcoming on the next national holiday.

CAMPUS CALENDAR

Hereafter the Campus Calendar will be a permanent feature of the Varsity News. In order to insure publication of any events occurring on the old or new campus, report such news to the editor before Tuesday noon, the deadline for such items.

- WEDNESDAY, SEPTEMBER 24
11:55 a. m.—Sodality Meeting—C. and F. Dept. Engineers will also meet at the same time, on account of the pep meeting tomorrow.
7:30 p. m.—Dramatic Society meets in Room 106, C. and F. Bldg. Students may get two hours credit for membership.
7:30 p. m.—Civil Engineering Society meeting in Room 206, Engineering Bldg.
8:00 p. m.—Delta Sigma Phi meets in Smoking Room of C. and F. Bldg.
8:00 p. m.—Argon Fraternity meets at Highland Park K. of C.
THURSDAY, SEPTEMBER 25
8:00 p. m.—Glee Club meets in Room 106, C. and F. Bldg.
8:00 p. m.—Epsilon Sigma Phi meets at Fraternity House.
FRIDAY, SEPTEMBER 26
7:00 p. m.—Organization of Acolytes Society in Fr. Scott's office.
8:15 p. m.—University of Detroit vs. Adrian at Dinan Field.
SUNDAY, SEPTEMBER 28
8:00 p. m.—Epsilon Sigma Tau Smoker at Tuller Hotel.

- freshmen not worthy of the name. The football players need not think because of their importance,—feigned as it is—that they are superior to the other freshmen—who, of course, are expected to submit to the dictates of the Sophs. That is not so and if the freshmen footballers care for special emphasis on their initiation, they are trying the correct method. An entire new outlook and consequent obedience is expected and unless it is forthcoming—drastic measures will be resorted to. For the enlightenment of the Freshmen we publish the Freshmen rules.
FRESHMEN MUST:
1. Wear blue shirts AT ALL times.
2. Wear pots and use them as designated whenever passing an upper classman, a co-ed, or a faculty member.
3. Use the North entrance of the Commerce and Finance Bldg.
and the East entrance of the Engineering Bldg.
4. NOT smoke cigarettes, cigars or regular pipes on the campus. Smoke only corn-cob pipes. This refers to the stadium also. Frosh must not be caught anywhere within the confines of the campus with anything but a corn-cob pipe.
5. Carry large kitchen matches AT ALL TIMES.
6. Address Sophomores as SIRs.
7. NOT wear high school or other college insignia.
8. NOT precede an upper classman into a building.
9. NOT cut across the lawns. Sidewalks were put there for use, not for ornamentation.
10. BE present at all pep rallies and other gatherings.
11. Build all bonfires.
12. Furnish all entertainment.
13. STUDY their lessons.
14. Obey all further rules that may be issued by the Sophs.

# TITAN SPORTS

## Finest Outdoor Lighting System in Country to Have Inaugural

### TITAN TOPICS

#### Titans Prepared For First Game Friday Night

As the bright streets lights during summer evenings drew a humming horde of varied insect life, so did the scintillating spectacle of Dinan Field, arrayed in its first floodlight glory of the year, last Friday evening attract thousands of eager football fans, waiting for a first glimpse of the 1930 edition of Titans and of the new illuminating system at the university stadium.

The practice might well be called an excellent advertisement for the succeeding contests. The novel lighting lay-out was adjudged by all as thoroughly efficient and by far superior to the more numerous standards employed last year. Also, although the spirit of a regular game was lacking, the scrimmage between the members of our varsity aggregation never allowed the watchers' interest to lapse. Repeatedly, the huge throng applauded spectacular runs or brilliant pass plays. It was an entirely interesting evening.

The coming football season at the university was considered important enough by the editors of the *Detroit Times* to be included in their radio period, which is broadcast daily under the name of "The Time's Best Story".

Harold Kahl, who covers the Titan sports contests for his paper, interviewed head Coach Charles E. Dorais, and the mentor's answers to the writer's questions disclose some interesting facts.

The new "shift rule" came in for a great deal of discussion, for Titan followers have been wondering whether or not this added regulation will in any way hinder the offensive play of our team as well as all of the elevens who employ this means of deceptive formation.

Dorais was emphatic in stating that he had no intention of abandoning the shift. "I'm certainly going to use it again this year," he said. "I was brought up under this style of play and the new regulation is not going to prevent me from teaching the shift."

This statement is not mere reluctance on the part of our head coach to relinquish his system of play. He had reasons to back up his opinion. He was quite candid in saying that he favored

## NIGHT TURNED TO DAY BY POWERFUL LIGHTS

New System Designed By E. J. Labadie, Class of '22; Other Improvements Prominent in Athletic Plant

Football enthusiasts will have an unusual treat in store for them at the opening game Friday evening at Dinan Field, when the Titans usher in the 1930 season under the most powerful set of lights for night football in the world. In addition to the luminary features many new improvements have been made on the grounds and buildings. Outstanding is the erection of a locker house providing dressing rooms, showers and athletic offices.

Six steel towers, one hundred feet high, comprise the supports for the light reflectors. Each corner tower has four reflectors that contain a single lamp of ten thousand watts or a total of one hundred and eight horsepower. The center towers also have four reflectors of a different type that contain ten one-thousand-watt lamps. A grand total of 320,000 watts, or 320 horsepower, is used by the entire system. The light produced is about five times as great as that recommended by authorities for night football. Independent of the gridiron lights are twelve one-thousand-watt lamps used solely for lighting the stands. This is an important feature as it returns to the game all the color of a sunlit afternoon. The absence of this color has heretofore been one of the biggest arguments against night football games.

The system was designed by E. J. Labadie, a graduate of the college of engineering, and is heralded by experts as five years ahead of anything in the world. The keen interest shown in the electrical industry is evidenced by the fact that many men have been sent to inspect the lights. Tad Jones, nationally known football coach, who witnessed a night practice yesterday, has this to say: "It is the greatest thing I have ever seen."

Last year's system was far ahead of anything in use at the time but lacked an important advantage offered by the new lights, that of taking pictures. Under the tremendous power now employed it is possible to get views without the aid of flashlight powder. The operating cost for the entire system is about forty dollars per hour per lamp.

At the south end of the stadium is another modern feature of athletic plants—a shower and dressing room, an equipment room containing \$10,000 worth of football regalia, an automatic washer and dryer. Also included in the building, which measures 108 by 41 feet, is an up-to-date clinic for patching up the injured player. The two

the shift, since it gave lighter men an opportunity to play, that it was a more clever style of play than set formations, and that it gave an intelligent player a chance to excel.

"I think," continued Dorais, "that the game would be dull and lose a great deal of interest and color if the shifty style of play was abandoned in favor of the set style which places a premium on power and weight."

And so, when the Titans line up against the Adrian team, to pry off the lid of the 1930 season, they will start out to fulfill the promise their coach made when he said, "We will come to the stop that the new rule demands, but our play will not be hurt to a large extent."

This shift rule is practically the only change in the intercollegiate gridiron regulations this year. Because of this, it has received a great deal of newspaper publicity. Every syndicate writer has included in his articles on the coming season, some sort of a comment on the rule. All radio football speakers have spent several of their allotted minutes in expounding to the fans the workings of the change. Consequently, the teams using this style will be watched during the year to see whether or not the amendment has been successful. We in Detroit will then be afforded a first-hand opportunity to see the way it will work out in practice.

dressing rooms have a total of one hundred and ninety-eight lockers accommodating both the Titan squad and the visiting teams. These lockers are heated, ventilated and disinfected. Also incorporated in the dressing rooms are the toilets and modern foot baths. The exterior of the building has been treated to blend with other structures on the campus.

The old wooden fence has been replaced by a new wire fence, in keeping with its surroundings, and will afford a worthy barrier to the "One-eyed Connellys" that are in abundance about the stadium.

The untidy appearance under the stands proper has been eliminated by the placing of a concrete floor under the entire stadium. The stadium itself has been covered with a coat of preserving paint which will add greatly to its life and beautify the structure. The seats have received a coat of paint in place of the customary oiling given in the past.

## GRID TUTORS DRAW LARGE ATTENDANCE

Famous Coaches Drill 55 Pupils in Modern Football Tactics

Coach "Gus" Dorais, in addition to his activities as the Titan mentor, conducted a coaching school this summer at Assumption College in Ontario. This was the first American school of its kind to be established in Canada.

Forty-five football coaches from the U. S. and Canada answered the call to brush up on football with Coach Dorais and his staff of famous exponents of the gridiron sport. Most of the registrants were from the U. S. about twenty states being represented. About four students coaches were from Canada. Each of the gridiron specialists was an expert on his particular subject: each gave eight hours of intensive instruction—explaining and diagramming favorite ground-gaining plays. Lectures and field work were the order during the day, and around the table discussions occupied the evenings.

Beginning on August 20, the school was in session ten days. Each morning Coach Dorais opened activities with lectures on passing, running, different plays, defensive playing, equipment training and choice of coaching personnel. Coach Glen Thistlewaite of the University of Wisconsin, lectured on and demonstrated the fundamentals of football. B. F. Van Alstyne, basketball coach at M. S. C. gave lectures and demonstrations on the court game from 1:00 until 2:00 each afternoon. "Bud" Boeringer, Coach Dorais' capable assistant at the University of Detroit, gave a special lecture on "Center Play"; Harry Klipke, head coach at the University of Michigan, treated all phases of the punting game. Tad Wieman of the University of Minnesota, explained defensive line play. Nobel Kezer, head mentor of Purdue University, had charge of sessions in offensive line playing. "Doc" Lambert, who is codifying

(Continued on Page Four)

## HIGHLAND PARK AND U-D MEET AT NIGHT

Keen Rivalry Will Bring Large Crowd To Dinan Field on Night of Nov. 7th

Coach Steamer Horning will give Coach Harry Lennox a birthday present of either a defeat or a victory on November 7.

On that date, which falls on a Friday night, U. of D. High will meet Highland Park in the first high school night game ever played at Dinan Field.

It is too early for predictions, as the teams have had but one week of practice. Both squads have been hard hit by graduation. Eight of the Cubs' eleven regulars have graduated.

Rivalry between the two schools will bring the largest crowd to witness a Detroit high school game.

In an afternoon tilt last October, the Cubs defeated the Polar Bears, 13-7.

## Students... Attend the First Football Pep Rally

Thursday Noon Stadium

Father Gross, Varsity Coaches, and members of the 1930 Titans, scheduled to speak.

Everybody Be On Hand!

## FOOTBALL MEET TO BE HELD THURSDAY

All Students to Attend Big Demonstrations; Coaches, Players to Speak

A huge pep rally will be held at noon in the stadium Thursday, September 25, and all students are requested to be present. There will be speeches by Rev. Mark Gross, S. J., faculty athletic director, Rev. Joseph Scott, S. J., dean of men, and Coach Dorais. Members of the football squad will be there (perhaps to add local color to the affair), and a good turnout of students will make this rally a highlight in the season's activities. The cheering squad will be on the field and will need the support of every full-blooded Titan.

The purpose of this meeting is to get one acquainted with the cheers, songs, and how one should act when in the stands. The university is composed of many different types of students, and when in the stands he sometimes acts like one of those excited old grads that you see pounding and thumping his neighbor.

Come to the rally and you will not regret it. When you feel like yelling, yell!

### Reform Where Needed

If Amos Woodcock keeps at it, the world may eventually become somewhat safer even for prohibitionists. The new director of Volsteadian enforcement has declared his intention of urging all agents to conduct themselves like lay-abiding citizens. Indeed, he has gone still farther in his rash audacity and has suspended, for five days each, two officers who apparently believed they owned the universe.—The Commonwealth, New York.

## LARGE FROSH SQUAD OUT

Many Prominent High School Gridders Are Included Among Candidates

### SUCCESSFUL SEASON SEEN

One hundred and fifty freshmen football candidates reported at the initial practice session held at the University of Detroit Stadium on Sept. 15. According to Coach John Fredericks, it is one of the most promising yearling squads in recent years.

Included in this squad were "All State" and "All City" players from all parts of the country.

From Detroit we have Ed. Turashoff, of Cass Tech; Frank Morsey and Hank Kolodiz, of University of Detroit High, each of whom at one time or another has been named on an "All State" high school eleven in the past two years.

From outside of Detroit, we find John Tooker, "All State" fullback from St. Augustine, of Kalamazoo; Orville Loyer, "All City" guard from Holy Redeemer; Michael and Robert Gibbons, who made the "All State" team in Minnesota; Fred Antoni, "All-Indiana" center last year; Steve Sosko, "All City" fullback last season at St. Johns in Toledo; Francis McCarthy, "All City" halfback from Akron, Ohio.

Aside from these there were a host of others who won places on "All City" and "All State" second teams and honorable mentions in their home sections. From this squad the coaches foresee oncoming replacements made vacant by graduation.

The schedule arranged by Coach Fredericks includes: Michigan State, Ypsilanti Normal, Ferris Institute, Albion, and a tentative date with Kalamazoo.

## LLOYD BRAZIL ACCEPTS NEW ATHLETIC POST

Lloyd Brazil, whom we all know as the former captain and star of the football squad, is now business manager of all athletics.

Brazil is handling the printing and distribution of tickets for all athletic contests. He has his office in the athletic house. Anyone wishing to secure extra tickets for the various athletic events should either see Brazil at the athletic house or call University 2-8737 and make reservations there.

Mr. Brazil is also responsible for the many repairs and improvements to the stadium. He has seen to the repair and sale of the boxes for this seasons' games.

Brazil will police the grounds during the game and help in the sale of tickets at the gate.

With these duties on his hands, "Braz" will probably be very busy during the coming year.

## Fall Practice Starts With Sixty-three Candidates Out

Brazil is Newest Addition to Coaching Staff; Will Instruct Backs

They were all anxious to don the football togs once again and they exhibited that same pep and enthusiasm that is characteristic of a University of Detroit football team. When Head Coach "Gus" Dorais and his staff of three All-American football players led the 63 Titan athletes—ranging from 5 feet 6 inches to 6 feet 3 inches in height, and the lightest weighing only 153 pounds and the heaviest 205 pounds—to their initial practice of the fall football season on Sept. 8, he was burdened with some difficult tasks.

He completed his biggest task last spring when his call for football was answered by over 125 athletes. It was a long drawn out process for the candidates all possessed size and ability but after the four weeks of that early training season were completed Coach Dorais, ably assisted by his staff of football teachers, cut the squad to 63 probable candidates for present and future U. of D. varsities. Some of the men that were shunned had enough ability to win a berth on any large college football team but it just happened that there were so many good players that some had to withdraw and once more the factor experience was prevalent, for out of the 63 players every man was either a former member of the freshmen eleven or a present varsity player.

With the large squad one sees an addition to the coaching staff. Lloyd Brazil, former leader of the 1929 Titan football club, will make his debut in the collegiate coaching game when he will assist Head Coach Dorais in the backfield. The other two All-Americans, namely Harvey Brown, of Notre Dame, and Bud Boeringer, also a Rockne product, will continue coaching the line. The former will begin his third season aiding Dorais while Boeringer is entering his fourth year in the coaching racket. The U. of D., famous for its immovable and impregnable forward walls, can trace this fact to the work of the two aforementioned line mentors, and with the abundant line material on hand this year Messrs. Brown and Boeringer will again have a chance to display their knowledge and ability at coaching. Ultimately, Athletic Director and Head Coach Charles E. Dorais will guide his sixth Titan football machine and his past records speak very well for his genuine ability inherited from his All-American football reputation received at Notre Dame when he and Rockne teamed together to produce that well-known Dorais-to-Rockne passing combination.

As for the practice, Coach Dorais drilled his men from Sept. 8 to Sept. 15 before they engaged in their first scrimmage of the fall season on the latter date. During these six days the Titan squad was coached in the class rooms on designing plays and learning them thoroughly and later applying them in dummy practice on the field. Sitting up exercises were taken in order to remove some of the aurodupols gathered during the sultry summer months. Tackling and blocking were specialized in besides learning the intricate Notre Dame style of shifting and other features.

But, by the time of the first scrimmage under the newly established arc lights last Friday, Sept. 19, at Dinan Field, the squad was in fairly good condition. On this evening Coach Dorais divided his outfit into three different teams under the grouping, red, white, and blue, and the eleven bearing the red colors flashed to victory on a last minute play. Roy Cogan, promising young Sophomore halfback, tossed a 40-yard pass to the giant Cicotte to produce a touchdown and win the contest. Parsaca with his punting and broken field running ability, Ross with his feet-ness of foot and dire improvement at catching and returning punts, O'Neil continuing to exhibit his trait of being one of the best natural football players on the team and improving very much in blocking, all showed to good advantage. Capt. Storen gave his usual fine performance at fullback.

The practice is still continuing and Coach Dorais and his staff are priming the U. of D. football team for the initial game of the 1930 season next Friday evening under the arc lights, but still the Titan mentor has some difficult tasks to accomplish. To date he knows not what men will represent the first team when the opening whistle sounds next Friday.

So Head Coach Dorais is still weeding out his men in order to find a good available first team and he continues to find difficult tasks.

## "Tad" Jones Watches First Night Practice

Impressed By Fine Spirit Displayed By Local Gridders

Howard H. Jones, known to football fans throughout the country as "Tad," Yale's grand old grid mentor for more than a decade, was among the throng of spectators that watched the Titan squad work out Monday night under the powerful lights. At present the celebrated coach is making a tour of the foremost colleges of the country as a representative of the Christy Walsh newspaper syndicate and, of course, U. of D. was included in his itinerary.

About the time that a young chap named Dorais was winning his fame at Notre Dame, Jones began his remarkable career as a football coach. Since that time he has done a great deal for the sport and he has been responsible, in a great measure, for the phenomenal growth that it has attained. The Yale tactician's name is linked with such immortals as Camp, Rockne, and Stagg. When he learned football, the game was a rough-and-tumble affair which was never considered official unless a few eyes were gouged and a neck or two was broken. Due largely to his innovations and improvements the game has become speedier and more thrilling.

Recently, his services were secured by the Christy Walsh newspaper syndicate in order that all fandom might receive the benefit of his deep sagacity and extensive knowledge of the grid sport. When the present season approached it was arranged to send him to the leading schools of the country in order that he might become acquainted with their prospects and relative strength. One of the most important stops on his route was at that college in the motor city whose meteoric rise in the past few years has amazed the sporting world.

Without any of the ballyhoo that usually accompanies the arrival of such a renowned character, the man who has put together some of the finest football machines the country ever saw, arrived in town Monday, and, that evening, slipped quietly out to view Dorais' proteges with his trained and critical eye.

The veteran coach was especially impressed by the splendid spirit which the entire squad displayed. Although he did not attempt to forecast what the future held for

the Titans, it is safe to say that any team possessing their aggressiveness and determination won't be on the short end of the score very frequently.

As the master strategist watched the scarlet-shirted members of the Titan squad running through their workout with characteristic dash and fire, perhaps his thoughts wandered to other days and other teams. Unbeatable, fighting teams. Teams that have added many pages of reckless daring and flaming courage to the annals of the gridiron. In short, teams not unlike the U. of D. elevens of recent years.

Franklin P. Adam's idea of an all-day sucker is one who rides 300 miles in a rumble seat.

## CLOSSON BROS. For Smart Haberdashery

Just Unpacked... New sweaters, all styles and colors. New hats, priced \$3.45 to \$7.00. New Collegiate caps, \$1.50 to \$2.45.

# Alumni Ass'n Asks Aid In Locating Members

Complete Addresses of All U. of D. Graduates Are Sought; List Printed

For some time the University of Detroit Alumni Association has endeavored to obtain the complete addresses of all its members whose present location is unknown. Every week the Varsity News prints a list of only those missing from the records of the Alumni Association, and not the complete roll-call of the past classes.

The co-operation of the alumni in this work proves most helpful, and is greatly appreciated. It is hoped that a complete list will be made of all graduates, and anyone possessing information concerning those listed below will please communicate with Jay Maley, secretary

## WOMEN'S LEAGUE TO HOLD MEETING

The first meeting of the Women's League will take place in the League Room Thursday, Oct. 2, where plans for the coming year will be discussed.

The League plans a full season, and hopes to realize enough funds to lay aside for the new League House which will be erected sometime in the future.

The committee for the third annual Halloween Dance will be announced. A bridge tea is also planned for the near future.

As an innovation, the League this year is offering the new "Galamits" which are very popular with the students in the East. "Mickey" Sullivan, sales manager, will announce a sales plan in the next issue of the Varsity News.

## THE CO-ORD TO BE PUBLISHED BY ENGINEERS

(Continued from Page One)

Joseph A. Fisher, a Senior long identified with activities in the engineering school, has been made editor-in-chief of the magazine. Assisting him as managing editor is Ralph W. Boone, who has acted on the staffs of both the Varsity News and the Tower for the past three years. Bernard A. Chapman, is assistant managing editor in charge of the Section B men. Sherwood A. Walters will handle the position of circulation manager, with a small corps of assistants. The art staff will consist of Olaf Saari, Mateo Pardo and Harvey Edwards, all students of the architectural department.

Constance T. Maier, business manager for all campus publications, will likewise handle this work for the Co-Ord. The advertising department, under the direction of Joseph A. Lukyex, will also have the tech magazine under its care. Responding to a call for reporters and contributors were over thirty enthusiastic tech students of Section A. The same number is expected to be recruited from Section B when they return to school early in October.

William P. Godfrey and Ward S. Reilly, of the English department, will act as faculty advisors to the staff.

The magazine will be published monthly with twelve issues a year. This will enable a great deal of industrial material to be published during July and August, the only months that Tech school is not in session.

Father Morrissey, regent of the engineering school, and Dean Lawrence, are backing the new venture and agree that it is an important step forward not only for the engineering school but for a greater University of Detroit.

## FRANK J. POTTS TAKES NEW POST

(Continued from Page One)

appointed Frank Potts, a student of the College of Law, to take care of "contact" work—consulting employment managers in the city searching for part-time help to aid in the placement of even more students than formerly.

Students realize that positions at present are not readily found and in consequence are exercising patience with the efforts of the department. To date a number of contacts have been made assuring U. of D. of A. & S. and C. & F. first preference in obtaining such employment providing the student will observe a few simple points suggested by the Placement Bureau bulletin board. That is to say, every student placed should remember he carries the responsibility of treating with care the confidence placed in him assuring future U. of D. students of a good recommendation. In seeking a position it is very important that his acceptance or rejection should be reported immediately to the office. Failure to do this must result in the removal of that student's name from the lists.

Francis McDonnell, Soph. C. & F. student, has replaced Frank Potts in caring for the office end of the work. He may be found in Room 109 in the Chemistry building after 1 p. m. every day. Applications and reports should be made in the afternoons as far as possible in order to facilitate the work of the Placement Bureau. Please watch the bulletin board.

of the Alumni Association. Call Arlington 8738, University 2-6000, or write Mr. Maley in care of the U. of D.

## FRESHMEN SWELL HIGH SCHOOL ENROLLMENT

### Fr. Meskell Replaces Fr. Carron Who Returns to John Carroll U.

Another Freshman class, 85 strong, entered the University of Detroit High School on September 4 and swelled the enrollment to 315.

The students found Father Meskell in place of Father Carron who has returned to John Carroll University in Cleveland (from whence he came in 1925) and is taking up his duties as assistant to the dean.

Father Meskell was formerly Dean of Men at the University of Detroit and principal of St. Ignatius High School in Cleveland.

## MANY CHANGES APPEAR IN THIS YEAR'S FACULTY

(Continued from Page One)

Ph.D., of Cornell and Yale; Leo M. Byrnes, M.S., Chicago, who taught biology at Creighton last year; and acting as assistants, Francis Juriewicz, Martin Kaiser and Dr. G. del P. Flores, Lawrence Kroha and Dan Sheran having left for medical school.

The Engineering School has lost but one professor, in the person of H. M. Keal, who was in charge of the co-ordinator's office. He is replaced by J. Votrobeck. Further additions to the Engineering faculty are: H. P. Kean, M.A., mathematics; Karl Glauner, Ph.D., drawing and industrial engineering; T. C. Hanson, B.S., mathematics and survey; J. R. Bushyager, B.S., mathematics; J. Bringle, B.S., architectural drawing; C. F. Kopp, B.S., descriptive geometry; C. J. Shires, English; A. J. Meyers, aeroplane motors; G. R. Boyd, M.S., chemistry; R. J. Abele, B.E.E., physics; C. Buten, B.C.E., chemistry; N. Foyer, B.M.E., chemistry; Joseph McManmon, B.S., physics; Vincent McGuigan, John Kennaugh and Fred McRobert, student instructors in physics.

The day Commerce and Finance records show that one professor, Lyndon O. Brown, has taken a position at Northwestern University. The school has added the following to its faculty: Dr. Jesse E. Pope, economics department, statistics and labor problems; P. Evans Coleman, marketing and advertising; Dr. M. E. Thurston, finance.

The day Law School on the downtown campus reports no change nor additions, the faculty remaining the same as last year. As the night classes of Commerce and Finance have not begun, no report has been issued.

# AWARDS ARE MADE FOR PAST YEAR'S WORK

## Announcement Reveals Men Winning Annual Scholarships

At the end of the last school year the following awards were made:

The Skinner Medal for excellence in debate was gained by Joseph A. Powers.

The Oratorical Medal was awarded to Ralph C. Johnston.

Nathan Goodnow secured the Scallen Medal as the athlete graduating with the highest scholastic average.

George Sterbenz, with the highest average of any in the graduating class, won the Alpha Sigma Tau key.

In the College of Arts and Science the Howard Walsh Memorial Medal for proficiency in English literature, was awarded to James C. LaDriere. LaDriere also received eighth place in the Intercollegiate Latin contest.

The Magi Medal was awarded to Louis Bridestine as the A. and S. Freshman with the highest average. regent scholarships were given to: Joseph O'Reilly, Freshman; Jack Douglas, Sophomore, and Gordon Harrington, Junior.

George Sterbenz won the Delta Sigma Pi Key, with the highest average in the C. and F. school.

These scholarship keys and medals are given for the purpose of inducing the individual student to make an extra effort to attain high averages in his courses. So far they have admirably accomplished their purpose.

## NOTICE TO CATHOLIC OUT-OF-TOWN STUDENTS

Father Scott wishes to call to the attention of all Catholic out-of-town students, paragraphs 3 and 4 of Section X, page 27 of the Student's Handbook: "Out-of-town students living in the university district must attend Mass on Sundays and holy days in the University Chapel. Attendance at this Mass is checked and a report sent home at the close of the school year—or before, if such report be requested earlier by parents or guardians. Every Catholic student is expected to approach the sacraments at least twice a month. The second Sunday of the month is the regular Communion Sunday."

Father Scott requests this, not because he believes that the out-of-town students have been negligent in attending to their religion, but the folks at home are not always so sure about the matter and it is to relieve them from any uneasiness that these regulations are made. Anyone having a special reason to be excused from these rules, such as going home for his working period, if he is an engineer, should see Father Scott at once so that his absence may be excused.

Masses are on weekdays at 7:00 and 8:00 o'clock and on Sundays at 8:00, 9:30 and 10:00. Confessions are heard every day before the Masses.

## CHARTER IS GRANTED FOR NEW ENG. SOCIETY

A charter was recently granted by the national body of the American Society of Mechanical Engineers for a student chapter on the campus. This is an honor as very few charters are granted to student organizations in the country.

At a meeting held Wednesday, Sept. 17, Lawrence Brady was elected president, Harold Potts, vice-president; Paul Urschaltz, secretary; and James McSweeney, treasurer.

Membership in the group is limited to 100 students and should be invaluable because of its national affiliations.

If all the cars in the country were parked end to end, the chances are some driver away up in front couldn't get his engine started.

## FRESHMEN...

Ask any Soph, Junior or Senior where the best place to buy Haberdashery needs is located, and they will tell you

# LEIB BROS.

There's a Reason

A store catering mainly to the needs of Young Men. Featuring Haberdashery that is smart in style—superior in quality, and priced to fit the student's purse.

LIVERNOIS AT FENKELL

# Titans Open Season Friday

(Continued from Page One)

starting backfield has at least one year or more of varsity experience and two were a part of the 1929 team that was forced to bite the dust only once. But with the abundant freshman material on hand the backfield candidates loom as plentiful.

Captain Storen, at fullback, will be the outstanding player in the rear of the line. Bill is a much improved player and with his added weight Coach Dorais presumes that he will lead his team to many victories and enjoy a great season as plunging fullback.

To date "Rocky" Parsaca, the gifted drop-kicker, and converted half-back will pair off with either letterman Louie Berg or "Snitz" Ross for the halfback position. The latter two were running mates of Brazil last year and all three are adept at broken-field running.

The quarterback position will be taken care of by either letterman Eddy Barbour or Chris Shearer, the sophomore from St. Benedict's. The former may get the call over Shearer, due to his experience, but the latter has been improving right along and his ability at passing may earn him the right to open the game against Adrian.

The line that has been tentatively arranged to face Adrian consists of six lettermen and one sophomore, all averaging slightly over 136 pounds. Hackett, the player that Dorais considers the strongest and outstanding man on the line, will hold down one end and will be flanked on the other side by Harvey Wrathel, the Sophomore that Coach Fredericks considered the best all-around grinder of his last year's frosh team.

The old reliable, Tony Nader and Joe Weiss, will be at the guard positions when the opening whistle sounds Friday. They are being closely pressed for their positions by some sophomore linesmen, but their experience and general all-around ability give them first call.

The tackle positions that have always been well represented on U. of D. eleven will have "Fats" Shimmer, 205-pounder, and Art Masucci, the "treat-um-nice" lineman from Ashtabula, Ohio. The latter alternated with Lee Hart at tackle last year.

The center of the line so far is a big aperture due to the loss of 250-pound Lardner. But George Howell, who relieved Lardner last year when the latter was severely injured, wins the right to be called first string center for his 179 pounds amount to over 200 in fighting wildcat. Late news reports that Howell has been injured and, as such is the case, the recently acquired Bill Fitzpatrick will shift to the middle of the line.

Replacements will be Coach Dorais's greatest asset for the coming football season. Not only has he possesses two or more men for every position on the team, a factor that never displeases any good football mentor.

Some of the backfield men that are likely replacements and perhaps certain regular varsity players are: Bill O'Neill, Paul Mohardt, Roy Cogan, Doyle Hamacher and others, half-backs; "Pinky" Hart and "Ed" Gracey, quarterbacks; and Lou White and George Hess, fullbacks. Any of these is liable to be seen backing up the red and white line this Friday.

The biggest problem that has confronted the U. of D. coaching staffs for the past several years is the scarcity of good ends, but one can leniently say that worry is completely overruled for the next three years at least. The Titan coaching staff guarantees fadom some of the best end plays seen at Dinan Field in a good many years.

A list of the available ends may be seen on the roster but the outstanding replacements consists of Cicotte, Campeau, Brown, Goetz, and Aaron.

Adrian presents a formidable tentative lineup also and their squad is less than half the number of red and white jerseyed men.

Coach D. R. Sprankle, formerly of Mt. Union, and now entering his eighth season under the banner of Adrian College, will bring 28 men to Detroit this Friday or even Thursday for secret practice under the arc lights. His teams have been winning for the past six years and they are constantly playing out of their class. The assistant coach is Bill Drager, a former star lineman at Adrian.

The tentative Adrian lineup consists of Brown, l. e.; Shoup, l. t.; Springer, l. g.; Aggett, center; Grif, f. h. r. g.; Hill, r. t.; Bryan or Nims, r. e.; Duncan, quarter; McGreevy and Patchett, half-backs; and Reed, fullback.

The opening contest will start at 8:15 p. m. this Friday, Sept. 26.

U. STUDENTS HONOR MEMBERS OF FACULTY (Continued from Page 1)

ties and devoted much of his time to the improvement of campus activity. It was due to his untiring efforts that "Merry Ann" was produced in 1926, opening the way to future successes. As well as being Faculty Moderator of the Opera, he served in similar fashion both the Athletic and the Publications department.

In a letter received by Phil Stackpole, Fr. Heithaus expressed his gratitude to the students of the University of Detroit. Following is the letter:

My Dear Phil:  
I was pleased and deeply touched by the gift which you and a number of my old friends gave me on the occasion of my Mass in Detroit. Its value to me was greatly enhanced by my realization of the self-sacrifice which it represents. May I ask you to get in touch with the many anonymous donors and tell them, in my name, that I thank them with all my heart and remember them daily in the Mass.

Sincerely yours,  
CLAUDE H. HEITHAUS, S.J.

# THIRTY CANDIDATES TURN OUT FOR BAND DRILL

## Outstanding Band Director is Sought to Head New Group

Although the University Band is still in a very formative stage, plans for the coming year are being arranged and a successful season seems in store. According to present arrangements, the band will consist of 50 pieces, and since the first practice was attended by only 30 prospective members, the need for a larger turnout is evident.

Efforts are being made to contract with a prominent bandmaster of Detroit to direct the organization for the coming year. Dr. Seehoffer is acting as faculty moderator, and John Labadie is student manager. Notices for the next practice will be posted on the bulletin boards of all the colleges.

## GRID TUTORS DRAW LARGE ATTENDANCE

(Continued from Page Three)

the rule book, spoke on "Officiating and Rules." Mike Rodden, Toronto sports editor and Rugby expert, treated of the lateral pass; "Dad" Butler, trainer of the Titans, explained conditioning and care of injuries.

During their spare time in afternoon and evening the coaches were offered a variety of recreations—tennis courts on Assumption campus; nearby golf courses and swimming beaches. Sightseeing trips about Detroit and Windsor were provided as well as excursions to the Detroit river and Lake St. Clair.

All who attended found the school most interesting and beneficial. Many have already announced their intentions of returning next summer to learn from such luminaries as Coach Dorais had under him, the great game which has made them so famous.

"Why don't you like girls?"  
"They're too biased."  
"Biased?"  
"Yes—bias this, and bias that, until I'm broke."

Sincerely yours,  
CLAUDE H. HEITHAUS, S.J.

The good appearance of tailor made clothes always pays its way.

You get wide selection, economy and a perfect fit in J. B. Simpson suits, especially if you order them through "RED" BENNETT, U. of D. Representative.
