re:search

# Finding Full Articles online

From the library homepage: (research.udmercy.edu)

## **Troubleshooting:**

- **Spelling counts** ... the system does not correct for spelling errors, so if you get "0" results, check your spelling.
- **Titles with an Ampersand (&):** if you get "Sorry this search returned no results" and the journal title has an ampersand (&), remove the "&" and type out the word "**and**" instead.
- Search defaults to **Title Begins With**. If you get "0" results, try changing the drop menu to **Title Contains**.

# **Deciphering the Results**:

Sample journal entry:

#### **Emergency Nurse**

Academic OneFile 2003 to present (Embargo: 3 months)	"Embargo: 3 months" means	
Expanded Academic ASAP 2003 to present (Embargo: 3 months)	e e	
General OneFile 2003 to present (Embargo: 3 months)	that articles published in the	
Health & Wellness Resource Center (w/alt health module) 2003 to present (Embargo: 3 n	last 3 months are not yet	
Health Reference Center Academic 2003 to present (Embargo: 3 months)		
Health Source: Nursing/Academic Edition 2002 to present	available electronically.	
Nursing & Allied Health Collection 2003 to present (Embargo: 3 months)		
ISSN: 1354-5752		
Publisher: RCN Publishing Company Limited		
Subject: Medicine and Health Sciences Medical Sciences Emergency Medicine; Medic	ine and Health Sciences Medical Sciences N	Vursing

UDM has access to *Emergency Nurse* through 7 databases. Most run from 2003 to the present with a 3 month embargo... *Health Source: Nursing/Academic* runs from 2002 to present. Choose a database that includes the year your article was published.

## **Getting the Article:**

- 1. **Click the year your article was published** (the listing of years may be located on the left side of the webpage, within a drop-down menu, or on the right side of the page)
- 2. If the years are not listed, look for a link that says "Archives" or "Past Issues"
- 3. Click the link for the **volume and issue number**.
- 4. The articles are usually listed in page number order. Scroll through the results for the page number or simply look for the title of the article.
- 5. A pdf icon or html link will be underneath the reference.
- 6. Click the link for the full article.

**Example**: (Not all journal sites will look like this but the steps are the same. Follow the same directions listed above).

Once you click a database link (eg. Academic OneFile, Nursing & Allied Health Collection, ScienceDirect, etc.), the publisher's webpage will appear.

The HTML and / or pdf icon are located under the article titles. Click to open the full text.

Check your citation (reference) for year, volume number, issue number, and page numbers; it contains all of this information. For assistance deciphering a citation see the "Anatomy of a Citation" hand-out.

Alternatively: you can also search for the journal title through the <u>UDM Nursing</u> <u>Library Guide</u>: (<u>http://libguides.udmercy.edu/nursing</u>)
